

## SUSTAINABILITY BRIEF: *Product Recycled Content*

InterfaceFLOR offers a wide range of products containing recycled content, face fiber and backing.

InterfaceFLOR works with a variety of raw material suppliers for the greatest flexibility in offering products that take less from the environment, including the use of renewable materials and components that contain recycled content. This flexibility will help us move towards our mission of becoming a sustainable company. Although achieving this goal requires much more than offering products with recycled content, recycled content is one of the most visible examples of our commitment. We continue to use sustainable design principles to develop products that move us further along this path.

We are the first carpet company to introduce true, closed loop recycling - fiber into fiber; backing into backing. ReEntry® 2.0 cleanly and efficiently separates fiber from carpet backing, giving us the ability to recycle post-consumer face fiber into face fiber. Our Cool Blue™ backing technology further allows us to reduce our dependence on petroleum based raw materials by recycling our own GlasBac® backing and similar competitor backings. A number of our products come standard with GlasBacRE, and all other styles, except Flor™, Super Flor™ and the Deco™ styles, are available with GlasBacRE for no extra charge. The industry's first collection of products containing post-consumer recycled type 6,6 nylon, the RePrise™ Collection, contains a minimum of 32-38% post-industrial/pre-consumer recycled content and 31-35% post-consumer recycled content for a total of 63-73% recycled content. In general, products backed with GlasBacRE offer a total recycled content of 54-78%.

### **Product Recycled Content**

InterfaceFLOR Products

**Key:** Pre-C% = Total Post-Industrial/Pre-Consumer recycled content      Total% = Total recycled content  
Post-C% = Total Post-Consumer recycled content      N/A = Not available w/ this backing option

**Note:** Actual recycled content varies by color for some products due to the recycled content of the fiber components utilized for each product color. For these products you will see a range listed in the table.

[1] Flor, Super Flor and the Deco styles are available only on Graphlar® backing, which offers post-industrial/pre-consumer recycled content. Flor and Super Flor have 36% total recycled content; Deco-Diagonal has 45%; Deco-Rib has 44%; and Deco-Tuft has 43% total recycled content.

**Issue Date:** 08.11.08. Please note that we update our recycled content information and other environmental data regularly to reflect changes and advancements in our technology. All calculations are based on historical averages by total weight of the product. Contact your local InterfaceFLOR Account Executive for updates or visit us on the web at [www.interfaceflor.com](http://www.interfaceflor.com).
