Gorgeous new AX TILE TOO™ created with breakthrough technology
Collection takes InterfaceFLOR's i2™ design platform to whole new level.

LaGrange, GA – InterfaceFLOR, LLC, (www.interfaceflor.com) the world's leading manufacturer of commercial modular carpet, announces the launch of a beautiful new carpet tile collection made with proprietary, game changing technology. **AxTile Too's** saturated color and patterns in varying scales across the floor is quite simply stunning.

The exclusive new Tapestry™ technology allows InterfaceFLOR to create carpet tiles that achieve the crisp, bold patterning and luxurious feel of Axminster or woven carpeting, without compromising the company's intense commitment to sustainable design. Most products manufactured through this innovative process are offered in InterfaceFLOR's Convert™ platform. And, the vivid contrast achieved through the Tapestry technology allows AxTile Too to take i2 to a whole new level.

Scaled to suit.

The whole concept of AxTile Too creates a phenomenal, never before seen style by mixing patterns and colors in varying scales for a completely unique and continuous floor. Of course, since it is an InterfaceFLOR i2 product, non directional installation and mergeable dye lots provide the ultimate in selective replacement and appearance retention, not to mention less installation waste. The variety of patterning is perfect for public spaces like convention centers, airports, shopping centers or hotels.

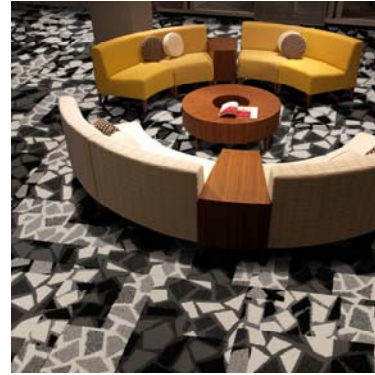

Traditional or Contemporary, your choice.

AxTile Too's look can range from traditional to contemporary with small and large scale patterns that can be colored to create a bold or soothing aesthetic. A collection that is created specifically for custom coloring, AxTile Too is eye popping perfection for a whole host of public spaces.

Smart and sustainable.

AxTile Too is made with post-consumer content fiber and optional post-consumer content backing resulting from our ReEntry® 2.0 carpet recycling program. And of course, it is also made to last, a core tenet of sustainable design. Durability, long-term appearance retention, superior colorfastness and stain resistance set AxTile Too apart. Its modular backing system provides superior protection against backing separation, edge ravel and rippling. And AxTile Too modular carpet tile's non directional, glue-free installation is faster than traditional installations and simplifies selective replacement, removal & recycling.

Featured “AxTile Too™” Products, NeoCon 2010

About InterfaceFLOR

InterfaceFLOR, LLC, is a subsidiary of Interface, Inc., the world’s largest manufacturer of commercial carpet tile. For 37 years, the company has consistently led the industry through innovation and now leads the industry in environmental sustainability. InterfaceFLOR is setting the pace for development of modular carpet using materials and processes that take less from the environment, and is well along the path to “Mission Zero®,” the company’s promise to eliminate any negative impact it has on the environment by the year 2020. Interface’s worldwide carpet manufacturing facilities maintain third party registration to the ISO 14001 Environmental System, and the company obtained the first-ever Environmental Product Declaration (EPD) for the commercial floor covering industry. The company is recognized globally for its commitment to build environmental considerations into its business decisions. For more information go to www.interfaceflor.com.
